

DISASTER RECOVERY AS A SERVICE

Disaster Recovery as a Service (DRaaS) from enablesIT gets you up and running again in your time of greatest need. It aids compliance with good governance and is an integral element of your audit requirements too.

If disaster strikes, you'll want to be up and running again as soon as possible. Whether the threat is cyber security, terrorism, natural disaster or equipment failure, enablesIT DRaaS gets you back in business quickly. We offer a range of solutions that includes cold, warm and hot standby servers, all delivered from our Tier III UK and US data centres. We also include virtual desktops that get your workforce effective again, wherever they are and whatever their device.

Each DRaaS solution is designed to meet your business needs by one of our experienced architects. They'll help you with the critical questions, such as "which applications?", "what data?" and "how quickly must you recover in the event of a disaster?". The solution is architected, tested, documented and rehearsed to ensure it is fit for purpose, whatever your business faces. And, of course, our DRaaS service is provided through a predictable, ongoing opex charge, avoiding large capital sums.

KEY FEATURES OF DISASTER RECOVERY AS A SERVICE INCLUDE:

- Delivered from our Tier III UK and US data centres
- Experienced solution architects to meet your specific needs
- Offered with cold, warm or hot standby options
- Virtual desktops get your workforce effective again, wherever they are
- Tested, reviewed and rehearsed
- Documented to ensure clear responsibilities and predictable results
- Agreed service levels with defined Recovery Point Objective (RPO) and Recovery Time Objective (RTO)
- Predictable operating cost model

BENEFITS:

- Ensure your critical applications and data are available in the event of the unforeseen
- Build greater organisational resilience with data and systems secured off-site in our Tier III UK and US data centres
- Ensure compliance with audit and good governance requirements
- Enable business continuity with virtual desktops that get your workforce working again, wherever they are
- Protect your people against travel disruption, security alerts and power outages through remote working
- Enjoy peace of mind with clear service levels and a documented, tested disaster recovery plan
- Avoid negative impact to your organisation and its reputation
- Immediately available without any capital expenditure
