Back up and Disaster Recovery

Securing your data, ensuring business continuity

enablesIT

Protecting Your Data from Disruption

Data loss and downtime can halt productivity and cost you money. Our backup and disaster recovery solutions ensure business continuity—whatever happens.

Data Protection

Automated backups safeguard critical files and systems, reducing the risk of data loss and enabling quick recovery.

- Continuous backup
- Cloud storage
- File integrity

Disaster Recovery

Fast, reliable recovery plans restore systems and operations with minimal disruption following unexpected events.

- Rapid restore
- Failover systems
- Tested protocols

Business Continuity

Keep operations running and reduce downtime with a continuity strategy tailored to your organisation.

- Risk planning
- Uptime assurance
- Workflow recovery

Don't wait till your network shuts down before saving your data...

About Us

enablesIT

Why Choose Us

Reliable Support, Anytime

We go beyond 9–5, offering support from 8am–6pm, with optional 24/7 coverage—including evenings, weekends, and bank holidays. Whenever you need us, we're there.

Proactive Monitoring & Management

Our real-time monitoring detects and resolves desktop issues before they impact your business. You'll also gain full visibility through our asset management portal.

Robust Security & Maintenance

We prioritise security with anti-virus protection, malware monitoring, and scheduled patch management—keeping your systems safe with minimal disruption.
