

# Network Architecture

Designing structured, resilient networks built around your business

**Reliable, secure, and  
ready to scale as you grow**

Designed for the way you work, our network architecture services align with your operations, growth plans, and long term goals to create a secure, scalable foundation for your IT environment.

## Business Design

We design networks based on how your organisation functions, ensuring performance and scalability without unnecessary complexity.

- ✓ User-Centred
- ✓ Operational Fit
- ✓ Scalable Design

## Reliable Foundation

Structured, documented, and resilient architecture that simplifies management and reduces risk across your entire IT environment.

- ✓ Clear Topology
- ✓ Logical Segmentation
- ✓ Minimal Failure Points

## Future Ready

Our designs support future upgrades, remote access, and integration with cloud and security systems without costly rework.

- ✓ Cloud-Ready
- ✓ Secure Integration
- ✓ Adaptable Framework

# About Us

## Why Choose Us

## Our Services

### Reliable Support, Anytime

We go beyond 9–5, offering support from 8am–6pm, with optional 24/7 coverage—including evenings, weekends, and bank holidays. Whenever you need us, we're there.

### Proactive Monitoring & Management

Our real-time monitoring detects and resolves desktop issues before they impact your business. You'll also gain full visibility through our asset management portal.

### Robust Security & Maintenance

We prioritise security with anti-virus protection, malware monitoring, and scheduled patch management—keeping your systems safe with minimal disruption.

## Don't just take our word for it...

*"We partnered with enablesIT in mid-2020 and all our contacts there are friendly and efficient – I don't have to chase up on queries and the projects are managed professionally."*

**Quantum Design**

*"We have entrusted enables IT with managing and arranging numerous projects which have been completed successfully allowing our business to continuously operate effectively."*

**Prusik Investment Management**

Don't wait for a network issue to disrupt your operations
